Duncan Roberts went to Calgary on Saturday.

Lloyd Robinson was a Calgary visitor last Monday.

Mr. and Mrs. Wm. Meade were Calgary visitors this week.

Mr. and Mrs. C. Long, of Cereal, were visiting friends in town Wednesday.

Mrs. Nicholson went to Calgary last Friday for a few days visit with her son.

Mr. and Mrs. Jas. Rennie took in the Stampede at Calgary for a few days this week.

S. A. Wilton, of the Heathdale district, went to Calgary Sunday to spend a few days.

Mrs. John Cooley returned the first of the week, after spending about two weeks with friends in Champion.

Mr. and Mrs. Wm. McGaffin, of Carstairs, are visiting at the home of the latter's parents, Mr. and H. Howton, this week.

Mr. and Mrs. Carl Walker, of Calgary, visited this week at the home of the latter's uncle and aunt, Mr. and Mrs. C. E. Neff.

W. S. Lee is building an addition 20x40 feet to the side of his store. This new addition will be used as a machinery warehouse.

Mr. and Mrs. P. Peterson went to Calgary the first of the week to attend the Stampede. They intend visiting Banff before their return.

Mr. and Mrs. O. Nelson, who have been visiting at the home of the former's parents at Comrey, for the past two weeks, returned home Sunday.

Mr. and Mrs. J. Geddes and family, of Vonda, Sask., were in Chinook on Tuesday. Mr. Geddes is manager of the Bank of Commerce at Vonda.

Mr. and Mrs. L. S. Dawson and family went to Calgary Sunday morning, where Mrs. Dawson will visit for a short time with her sister. Mr. Dawson returned home Wednesday.

The Misses Neff, who have been visiting with friends in Calgary for the past two weeks, returned home on Tuesday. They were accompanied by little Miss Vera Conlin, who will visit with relatives at Rearville.

Mr. and Mrs. I. W. Deman left on Sunday morning on a motor trip to the coast and to Oregon. Mr. Deman expects to be absent for about three weeks, while Mrs. Deman will visit with her daughter at Hood River, Oregon, for the rest of the summer.

Rev. A. G. Gay, of Cereal, was in town Tuesday making arrangements for the annual camp for boys at Gooseberry Lake, July 13 to 20th. It is expected that four or five boys from Chinook will take part in this outing.

A meeting of the Agricultural Society will be held on Saturday evening, when the appointing of judges, granting of concessions, etc., will be dealt with. The drive for membership starts tomorrow and it is hoped the girls will meet with success in their efforts.

The Chinook Baseball team journeyed over to Consort Wednesday to take part in the ball tournament. In the game with Consort they won out, 5-2, in the contest with Halkirk our boys lost out 11-5. The battery for Chinook was Blocksom and Steckle.

BURGLARS VISIT POOL ELEVATOR

Last Tuesday morning the office of the Pool Elevator was broken into by burglars, and the safe blown open.

L. S. Dawson, manager of the Pool Elevator at Chinook, left on Sunday for a short holiday, leaving Mr. Hocart in charge during his absence. Monday night Hocart was at the elevator about 10:30, and when leaving for the night everything was all right. Tuesday morning, about 7 o'clock, he was in the main office of the elevator and did not notice anything out of the way, but about 7:30 on again visiting the office he noticed a peculiar smell. He then opened the door of the inner office to investigate and found that the place had been burglarized during the night. Constable Torpey of Youngstown was immediately notified and when he arrived he found that the safe of the Municipal District of Collingwood, of which district Mr. Dawson is secretary-treasurer, had been blown open and the contents scattered about.

The condition of the safe showed at once that no amateur had done the job. Two holes had been drilled at the side of the combination dial of the safe and filled with explosives in order to blow open the safe. Blankets found in the office had been thrown over the safe to deaden the sound. The safe was in a badly wrecked condition. Endorsed cheques which had been paid into the municipality were scattered around the office. Mr. Dawson arrived home on Wednesday afternoon, and on checking up his books it was learned that around \$500.00 in cash had been taken. No trace of the burglars has been found.

Work Starts on Cooley's New Garage

Work commenced this week on the new garage being built by Cooley Bros. in Chinook. Excavation is being done for the basement and the building will be completed as fast as possible.

The building is to be 60 feet frontage on Main street and 160 feet long, built of cement and tile. The front of the building will be equipped for office and demonstration room and will be well lighted. Plate glass and stucco work will give the front an attractive appearance.

The basement will be used for a store room and for heating purposes and an up to date heating plant will be installed. The entrance to the work department will be at the side of the building. When completed this structure will be an attraction to the town.

New Telephone Headquarters

A crew of Alberta Telephone men have been busy in town this week transferring the local telephone central into the drug store. Mr. Jacques has purchased the building formerly occupied as the phone office and is having it transferred to the rear of his store, where it will be used as a store room.

The telephone department will be located immediately in the rear of the drug store.

Be sure to see the big Chautauqua programs in Cereal, beginning July 19 and continuing to Wednesday night, July 25. Get your season tickets in advance; it will pay you to do this. The price is only \$3.00; \$1.00 for children.

Co-operation Rather Than Discord

It has been one of Canada's greatest misfortunes that periodically throughout its history campaigns have been inaugurated having for their object the division of the people into rival camps divided by lines of racial and creed difference. Probably no one thing has in the past operated quite so disastrously to retard the growth and national development of Canada. Time and time again when some large national question was up for decision, the issue turned, not on the merits of the question and the national policy involved, but upon some petty race and creed cry. One of the outstanding cases which is still fresh in the public mind was the Reciprocity election of 1911 when, in the last two weeks of the campaign, Ontario was swept by one of these insidious cries, and tens of thousands of voters were stampeded from support of their economic convictions in favor of freer trade and wider markets.

Throughout his long career, both in private and public life, Sir Wilfrid Laurier pleaded and strove for unity and concord among all classes of the Canadian people. Hon. Mackenzie King is worthily upholding the same cause, and it is gratifying to note that Hon. R. B. Bennett, ex-leader of the Conservative Party in the Dominion, is throwing the whole of his eloquence and influence in the same direction. Speaking at Magog, in the Eastern Townships of Quebec, last month, Mr. Bennett said: "He who sows seeds of discord and distrust in racial and religious matters is a greater enemy to Canada than one who came with an armed force. You cannot develop a country by ill-will, hatred or contempt." A few days later at Coaticook, Mr. Bennett used these words: "The application of the Golden Rule in the life of a nation is quite as important as it is in the life of an individual," and he added that anyone who "in the heat of an election sought to raise old animosities, to sow seeds of discord, must not forget his responsibility for such unjust action."

Here in Western Canada it is absolutely vital to the welfare of the country that such words be heeded. To an ever increasing degree the people of the West are looking to and relying upon co-operative movements and enterprises to solve the economic problems of the country. To date these have attained a marvellous success in a comparatively short space of time. This has been accomplished by all classes, all creeds, people of all racial descents, in town and country, working together. There has been no line of demarcation in the upbuilding of these large co-operative organizations. The Wheat Pools of the West, for example, could never have attained their present proportions and power had any such foolishness as so often enters into political campaigns been allowed.

The unfortunate fact remains that if the people of a Province or Community are stirred up and divided upon racial or religious lines for partisan political purposes, or for any other reason, the inevitable result is to create suspicions and animosities in the community, or throughout the Province, which makes it extremely difficult, if not impossible, to get all classes together, or hold them together, in a true spirit of co-operation. If the people of the West are divided into Catholic groups and anti-Catholic groups, English-speaking groups and non-English-speaking groups, it naturally becomes impossible for them to come together in the right spirit of friendliness and co-operation which is so essential to the maintenance and development of such organizations as the United Farmers, the Wheat Pools, and other co-operative organizations.

These racial and religious campaigns have never got their proponents anywhere, have never accomplished good, but have always resulted in harm. They are in no sense constructive but always destructive. Despite any and all claims that may be made for them they are the reverse of British and open denial of that liberty and freedom which, it is our proud boast, is to be found and is guaranteed to all under the British flag.

Not only are these unscrupulous campaigns destructive of a real national spirit; not only do they retard national growth, development and prosperity; they render the task of government, whether in the Dominion and Provinces, or in municipal councils and school boards, difficult and sometimes impossible, and in all cases more expensive and less efficient. Western Canadians interested in the growth of their country, loyal to its interests, and committed to the policy of co-operation for the common good of all, should most emphatically set their heel upon the ugly head of the serpent of racial and religious ill-will whenever and wherever it may raise itself.

Learning From Canada and United States

Nations Realizing Foolishness Of Arming Against Each Other
The idea of renouncing war is not unfamiliar to us. War is renounced between England and Scotland, between Britain and the Dominions, between Madras and Bombay, between Bengal and Behar. The idea of war within the Empire is remote from our thoughts. The apprehension of the thing does not add a sixpence to

the estimates. And we may say the same of the relations between Canada and the United States. It is true that war has never been formally renounced by these two neighboring Powers; but in practice it is renounced, and neither country arms against the other. To these conceptions, familiar within the British Empire and characterizing for more than a hundred years the relation of Canada to her southern neighbor, it is now proposed to give a wider existence.

Insulin Distributed Free

Ontario Government Supplying More Than a Million Units a Month

Insulin is being distributed free to diabetes sufferers by the Ontario Government at the rate of more than a million units a month, on the average.

Hon. Dr. Forbes Godfrey, Minister of Health, has announced that the April distribution totalled 1,636,000 units.

Altogether 824 patients are receiving this treatment in Ontario and the total cost of manufacture and distribution per patient was \$5.00 during April.

B.C. Agricultural Production
Agricultural production in British Columbia in 1927 totalled \$76,509,289, the largest sum on record, an increase of 7.50 per cent. over the previous year. Exports of agricultural products increased by 19.23 per cent.

New Quarters For Wheat Pool

Central Office Building To Be Constructed In Winnipeg

The Canadian Wheat Pool, a farmer's organization, which handles more export grain than any other organization in the world, is to be housed in a new central office building to be constructed in Winnipeg immediately. The building will be 60 feet by 120 feet, of thoroughly modern construction, faced with Manitoba stone and will cost \$600,000.

The turnover of the Canadian Wheat Pool, which will be directed from this office exceeds an average of a million dollars a day.

ST. VITUS DANCE

A Trouble That Usually Attacks Young Children

St. Vitus dance is the name generally given to a disease described by medical men as chorea. This trouble usually attacks young children, though older people may be afflicted with it. The most common symptoms are a twitching of the face, the hands or the legs. As the disease progresses the twitching takes the form of spasms, in which the jerking motion may be confined to the face or all the limbs may be affected. Frequently the patient is unable to hold anything in the hands or walk steadily. In severe cases the speech is often affected. The disease is due to debility of the nerves and relief comes through an enriched blood supply.

Dr. Williams' Pink Pills have been most successful in reaching this trouble through their specific action on the blood, which it cleanses and purifies. The following instance proves the value of Dr. Williams' Pink Pills in this trouble. Mrs. Thomas Bowen, Bath, Ont., says: "Dr. Williams' Pink Pills have been in use in my family for years and always with good results. I believe they saved the life of my only son. At ten years of age he grew very nervous and the trouble developed into St. Vitus Dance. His legs and arms would jerk and twitch; then his speech was affected, and his condition was pitiable. At last there came a real little book telling of Dr. Williams' Pink Pills, and I decided to give them to him. By the time two boxes were used there was an improvement in his condition and in the time six boxes more were taken all traces of the disease had disappeared, and he was well and strong. I have also given the pills to my growing girls, and I know of no better strengthening medicine. I may add that the same applies to grown-ups as well."

You can get these pills through any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Kills Off Noxious Weeds

Alberta Farmer Has Invention Which May Prove Valuable

A machine to dig and destroy weeds has been invented by D. W. Warner, ex-M.P., Edmonton farmer.

A large rotary (horizontal) cylinder is the principal part of the new digger. In this cylinder are inserted hundreds of large spikes. As the cylinder revolves, at high speed the teeth mulch the soil, biting deep into the subsoil. Clouds of earth are thrown toward the rear of the machine. The dirt settles quickly while the weeds float through the air, finally coming down like spindrift over the newly-turned earth.

Weeds with extensive root systems, such as twitch grass and thistles, will fall an easy victim to the digger. Experiments carried out recently resulted in a field being left covered with finely minced twitch grass roots, like chaff which piles up behind the threshing machine.

No man or woman should shudder painfully about because of corns when so certain a relief is at hand as Holloway's Corn Remover.

Canada Mineral Industry

Capital employed in Canada's mineral industry in 1927 increased nearly \$18,000,000 over the previous year. The mineral output was valued at \$248,385,031, an increase of 4.6 per cent. over 1926.

SUMMER COMPLAINT Nearly Lost Her Little Girl

Mrs. Theodore Rivett, Anthony, Ont., writes: "Last Fall I nearly lost my little girl as she was suffering terribly from summer complaint. She became very thin and weak; had no appetite, and could hardly walk across the room without falling down. At last my mother advised me to get a bottle of

and after she had taken a few doses she was relieved.

I also found it a grand remedy for cramps, and would not be without a bottle of it in the house for anything."

Has been on the market for over 80 years; put up only by The T. Millburn Co., Limited, Toronto, Ont.

Memorial For Atlantic Flier

Parents Of Hon. Elsie Mackay Give \$25,000 Toward National Debt

In memory of their daughter, the Hon. Elsie Mackay, who perished in a trans-Atlantic flight, Vincent and Lady Incheape have given \$25,000 (\$500,000) to reduce the national debt. This announcement was made by Winston Churchill, chancellor of the exchequer, in the House of Commons. The money will be placed in trust and will be known as the Elsie Mackay fund. The sum given to the nation is the residue of the Hon. Elsie Mackay's estate. The donations will be left to accumulate for fifty years.

The Hon. Elsie Mackay, third daughter of Lord Incheape, British shipping magnate, made the attempt to cross the Atlantic by air with Captain Waller-Hinchcliffe. The take-off was from Cranwell aerodrome, Eng., on the morning of March 13. No trace of the two has been found since.

Victims Of Diseased Milk

97 Per Cent. Of Population Is Affected By Tuberculosis

Three out of every four cripples, excluding war and accident cases, are victims of diseased milk, Dr. A. E. Allen told an audience at the Health and Hygiene Exhibit in Winnipeg recently.

He declared that 97 per cent. of the entire population was affected by tuberculosis and that this condition was a social as well as a medical problem. Out of every ten, seven would not be visibly affected; two would break down and one would not recover.

The disease, according to Dr. Allen, came principally from infected milk and could readily be overcome by pasteurization and compulsory testing of cattle furnishing the supplies.

Opportunities Not Exhausted

Many Chances Yet For Immigrants Coming To America

Rolvag, professor at the University of St. Olaf in Northfield, Minn., came to this country in 1906, an immigrant without money. Today, as the author of a great book, "Giants in the Earth," he is famous. Standing on the deck of a steamer on his way home from a visit to Norway, he said that the chances for the immigrant coming to America today were as great as when he first came. That is significant. So many young people, native born and alien, feel that pioneering is done. They think the best opportunities have all slipped by. They misunderstand the resources and the constantly changing conditions of this world.

Excellent For Croupy Children

When a child is suffering with croup, it is a good idea to use Dr. Thomas' Electric Oil. It reduces the inflammation and loosens the phlegm giving speedy relief to the little sufferer. It is equally reliable for sore throat and chest, earache, rheumatic pains, cuts, bruises and sprains. Dr. Thomas' Electric Oil is regarded by many thousands as an indispensable of the family medicine chest.

Five Cent Air Mail

Reduction From Ten Cent Rate Announced In U.S. For August 1st

A new United States five cent air mail postage rate, to be effective August first, is announced by Postmaster-General New. A five cent air mail stamp has been authorized. The reduction from the ten cent rate was authorized by the Kelly Bill recently signed by President Coolidge. Now said he expected the cut in rates to increase the country's air mail business by from 100 to 300 per cent.

Plane Loses Its Engine

When the engine fell from his airplane while the craft was in the middle of a loop at a 1,500 foot altitude, Walter Brooks, of Allentown, Pa., righted the plane and glided to an easy landing. Neither he nor his passenger, Walter Harleman was injured. The plane had just started into a loop when the heavy engine broke from its supports and dropped. It fell half a mile from where the plane landed.

Honey Production

Honey production in Canada in 1927 was 23,647,268 pounds valued at \$3,600,623, according to a statement issued at Ottawa, this being an increase of 77 per cent. over the previous year, due mostly to a favorable season but also to the greater number of colonies.

While it may be true that British law gives a man the right to open his wife's letters, yet it doesn't give him a wife who will submit to that sort of thing.

Minard's Liniment For Insect Bites.

At First Signs of Pimples Use Cuticura

Anoint gently with Cuticura Ointment. After five minutes bathe with Cuticura Soap and hot water and continue bathing for some minutes. This treatment is best on rising and retiring. Regular use of Cuticura Soap and Ointment soothes and comforts tender, sensitive skin and keeps them clear, healthy and attractive.

Sample Pack Free by Mail. Address: Canadian Depot, 22 and 24, Victoria St., Montreal, P.Q. Cuticura Showing Stick 25c.

"New Canadians" Celebrate

Picturesque and Colorful Follies and Handicraft Festival

"New Canadians" from fifteen countries of Northern Europe joined in a celebration at Winnipeg recently to illustrate the national arts and culture which they are contributing to Canadian life. The celebration which took the form of a picturesque and colorful folk song and handicraft festival, was opened by Sir James Aikins, former Lieutenant Governor of Manitoba, in the rotunda of the Royal Alexandra Hotel, where handicraft exhibits were shown representing typical European market centres.

Sellers in Western Canada from Norway, Sweden, Denmark, Iceland, Germany, France, Belgium, Yugoslavia, Czechoslovakia, Roumania, Finland, Hungary, Ukraina, Poland and Russia were represented in the display of artistic handicraft. Programs of folk songs and dances were given every afternoon and evening with 400 performers appearing in national costumes and attracting large audiences.

The festival is regarded as a unique demonstration of the contribution of the nations of Northern Europe to Canadian life and the part which they are taking in the rapid development of Western Canada.

Use Miller's Worm Powders and the battle against worms is won. These powders correct the morbid conditions of the stomach which nourish worms, and these destructive parasites cannot exist after they come in contact with the medicine. The worms are speedily evacuated with other refuse from the bowels. Soundness is imparted to the organs and the health of the child steadily improves.

Entertained German Aces

Dinner Party Given In London By Canadian V.C.

Col. Bishop, the Canadian V.C., gave one of the strangest dinner parties ever held when he entertained in London, eight German aces, with several of whom he had actually fought bitter air duels during the war.

The best record among the Germans was that of Captain Carl Bole, leader of the famous Boelcke squadron, who shot down thirty-six machines against Bishop's record of seventy-two.

Province Has Large Surplus

The Alberta Provincial Treasurer has just been able to declare a surplus up to the end of the last fiscal year of \$279,763, which is \$200,000 greater than he estimated. The surplus is taken as a reflection of good times both in the business and agricultural life of the province.

It isn't always what a man knows but what he doesn't tell that makes others believe he is wise.

If the man who wants the earth succeeded in getting it he would kick about the taxes.

The average time of vessels going through the Suez Canal is 16 hours.

Dressed Poultry Exports

Minister Of Agriculture To Investigate Market In England

Before sailing for England the Honorable W. R. Motherwell spent some time in Montreal discussing the situation with reference to exports to England of dressed poultry. Latest sales have been made on the basis of 32 to 36 cents per pound for 3 pound chickens, and 39 cents seaboard for 4½ pound chickens. The total export of chicken this year from January 1st to May 31st, was valued at \$111,672. It is the intention of Mr. Motherwell to devote some time to this export market situation regarding dressed poultry while in Great Britain along with other agricultural products exported, such as butter, eggs, cheese, bacon, beef cattle, etc.

Tennis.

After a brisk game of tennis prevent stiffness by using Minard's.

English Pleasants For Saskatchewan

An attempt is being made in the Assiniboia and Loversburg districts to raise English pleasants of the ring-necked variety. It is not many years since the Hungarian partridge was introduced into Western Canada. The experiment will take some years, and if successful will furnish an added attraction for bird hunters.

Drives Asthma Like Magic. The immediate help from Dr. J. D. Kellogg's Asthma Remedy seems like magic. Nevertheless it is only a natural remedy used in a natural way. The smoke or vapor, reaching the most remote passages of the affected tubes, brushes aside the trouble and opens a way for fresh air to enter. It is sold by dealers throughout the land.

Indian Alimony

An Alaskan Indian was sentenced to pay his squaw alimony of one bull moose properly butchered and delivered; ten milk skins, dressed and stretched; five grey fox pelts, or one silver pelt, and 100 full-grown salmon delivered in season.

Time and season occasionally succeed where all other agencies fail.

Appleford Paper Products LIMITED HAMILTON, CANADA

The Interesting Story of Three British Immigrants Who Have Met With Success In Canada

Premier King pointed out the other day that there are, in the Canadian Government, three ministers who came to Canada from England: Mr. Dunning, from England; Mr. Forke, from Scotland; and Mr. Heenan, from Ireland. In a cabinet of eighteen members, three Old Countrymen hold the important portfolios of Railways, Canada, Immigration-Colonization, and Labor. And they came to the Dominion without financial backing.

The experiences of Mr. Dunning, Mr. Heenan and Mr. Forke are of interest not only because they represent England, Ireland and Scotland, but because they set their feet upon somewhat different political ladders. Mr. Dunning climbed up by way of his prominence in business and agricultural organizations; Mr. Forke by way of agricultural and municipal experience; Mr. Heenan, by way of municipal and labor affiliations.

Mr. Dunning achieved political prominence at an early age; Mr. Heenan in middle life; Mr. Forke, as an older man. They afford three interesting and quite different studies in immigrant success.

Mr. Forke came to Canada in 1882 at the age of twenty-two, took up land in a remote part of southwest Manitoba, and in five years was interesting himself actively in municipal affairs. He was twenty years reeve of Pipestone Wells eleven years secretary of the Manitoba union of municipalities and finally, its president. But he had been in Canada thirty-nine years and was sixty-one years of age before he was elected to the House of Commons. The following year he became House leader of the Progressives and in 1920, at the age of sixty-six became a minister in the King Government.

Among the immigrants who came to Canada in 1902 were Peter Heenan and Charlie Dunning. Heenan was 28; Dunning only 17. Heenan, born in Ireland but schooled in England, and for a time a professional football player, had been working as engineer and diver for a construction company in Costa Rica, had been attacked by yellow fever, and had examined the rival claims of Canada and South Africa as to healthier climate. He chose Canada, tried an Alberta ranch, preferred being a locomotive engineer, became an alderman of Kenora and chairman of the Association of Locomotive Engineers, and 17 years after coming to Canada was elected to the Ontario Legislature. Six years later he was elected to the Dominion House from a constituency larger in area than Great Britain. And in 1920, 24 years after his arrival in the Dominion, and at the age of 52, he became Minister of Labor.

Dunning's career was meteoric. He told the House the other day how, on first coming to the Dominion, he worked for the summer on a western farm at ten dollars a month. The next year his father came. And by working at wages which never exceeded a dollar a day and board (the equivalent of perhaps two dollars), they laid by, in a summer and winter, enough money to bring out the mother and five sisters. But at 20, nine years after his arrival, Dunning appears in the picture as vice-president of the Saskatchewan Grain Growers' general manager of the Saskatchewan Co-operative Elevator Company, and member of the Canadian Council of Agriculture. At 34 years of age he became Provincial Treasurer of Saskatchewan; then Premier of that Province, and in 1926 became, like Heenan, a Minister of the Dominion Government—age only 41.

In these three careers there is a lesson of hope for every immigrant and every intending immigrant. Not everyone can hope to be a Cabinet Minister; but all can hope for a greater degree of final comfort and prosperity than they are likely to attain elsewhere.—Toronto Star.

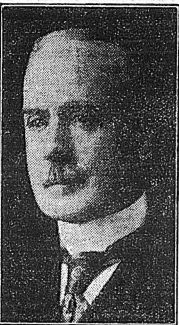

Demand For Cane-Sun Hay

The opinion is generally expressed that a fair quantity of imported hay is likely to be wanted if this year's Canadian crop is satisfactory in quality and price, writes Trade Commissioner Harrison, at London, in the forthcoming issue of the Commercial June 1 for the United Kingdom hay crop was for a yield 10 per cent. below the average, but rather better than last year.

Passenger on a branch line railroad (to conductor)—Why does the engine always let out such a piteous howl when we pass this spot? Because it was here the engineer first met his wife?

World's Greatest Creditor

In a report to the Economic Committee of the League of Nations at Geneva, some remarkable figures were disclosed. Although the United States are certainly growing in importance, Great Britain is still the world's greatest creditor; her foreign investments are roughly given as \$4,000,000,000. The United States investments are given at \$2,800,000,000.

Reindeer in the government's herd in Alaska, have been killed by volcanic ash that covered their feeding grounds, causing lung and throat trouble.

ENGLISH BULLDOG CHAMPION

Here is Kippa Jock, an English bulldog champion, purchased in England by Hec. P. Sparkes, president of the English Bulldog Club of Canada. He actually cost Sparkes \$1,905.25 laid down in Toronto, where the owner's kennels are located. Before he left England he was a winner at every show at which he was shown—and he was shown at all the most important shows. Kippa Jock will be shown at all the coming shows in Canada.

The Dangerous Fly

One Of Most Prolific Disease Spreaders Say Doctors. The physicians are beginning again to talk about the fly. They should be a friend to him; he promotes their business.

But conscientious physicians are devoting a good deal of effort to preventing the spread of disease, and they recognize the fly as one of the most prolific disease-spreaders of our region. That was an interesting experiment recently reported. They washed a fly and found by count that his bath water contained 1,250,000 bacteria that were not in it before the process.

Probably that fly was no filthier than the average run of the members of his family. The conclusion is that all flies deserve swatting; that all unwashed flies should be kept out of houses by screens, and that all places suspected of breeding flies should be cleaned up.

Canada Stands Fifth In Milk Production

United States At Head Of List With Germany Second

The eighteen largest milk producing countries of the world have, according to latest returns, 67,822,743 milch cattle. Of these the United States leads with 22,990,000. Germany is second with 10,066,517, then France, 7,701,410, Great Britain and Ireland, 4,358,279, and Canada is fifth with 3,894,311.

The total output of butter is 4,334,851,758 pounds of which Canada makes 272,209,287 pounds, and of cheese 2,278,918,835, and of this Canada's share is 172,248,379. The United States is head of the list in butter-making, with Canada sixth, and Germany heads the cheese list with Canada fifth. The per capita consumption of milk in the United States is 55.3 gallons, and in Canada 43.2 gallons.

Some men are so busy that they have no time to enjoy prosperity.

Poultry House Flooding

Cement Floors Give Trouble On Account Of Dampness

Cement flooring for the poultry house has the merit of durability and it does not harbor vermin, but many poultry keepers complain that it gives trouble in winter and spring on account of being continually damp. At the Charlottetown Experimental Station the cement floor was given a coat of roofing paint but it did not reduce the dampness to any appreciable extent as the litter soon became damp and unfit for use almost as quickly as where the floor was left without treatment. In another house a wooden floor was built and laid in sections two inches above the cement. This treatment, according to Mr. J. A. Clark, the superintendent, in his report for 1927, was very effective, the section remaining dry and requiring cleaning only about half as many times as the other sections of the same house that had the cement floor only.

E. P. Ranch Ships Stock South

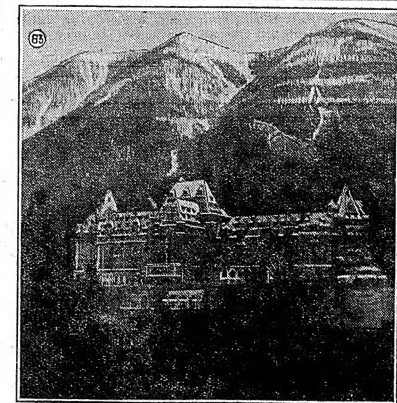

Important Shipment Of Pure Bred Stock Goes To California

Another important stock shipment has left the E.P. ranch for the Kenwood stock farms, Kenwood, California. This is the third shipment made to the famous stock centre, and consisted of seven cows, five Short-horn bulls, and five yearling bulls. Some of these were stock imported from the royal farm in England. James Watson, of the E.P. ranch, accompanied the bunch as herdsman, and will look over various prominent stock farms while in California.

Willing To Oblige

Bank Clerk—"But, madam, you will have to be identified before I can cash this cheque for you."

Fair Caller (blushing furiously)—"Oh, I just hate to do it, and George would be dreadfully angry, but I have a love-letter here which describes me fully if you would care to see it."

WESTERN HOTEL NOW COMPLETE

Still more majestic, standing alone, the Banff Springs Hotel, guardian of the Canadian Rockies, is again prepared for the summer rush of tourists and passing travellers. Many alterations have been made in the construction of the hotel while an additional wing has been built.

New swimming pools are a still further attraction, both warm and cold baths being built. Altogether there is a splendid and dignified atmosphere surrounding the new Banff Springs Hotel, which is rather that of an old-world mansion than of an hotel.

The old golf course has been renovated and enlarged from a nine hole to an 18 hole course, under the cheerful shadow of the mountains.

Trade Within The Empire Is Being Furthered Through Efforts Of The Empire Marketing Board

The development of trade within the Empire is a matter which, during recent years, has been given the very earnest attention of all those countries making up the British commonwealth of nations. It is felt that the fostering of intra-Empire trade will open up opportunities for trade relations that will not only serve to bring more closely together the various parts of the Empire; but as well, afford such direction to production and consumption of those commodities for which the various countries concerned are best suited to produce, that the well-being of the whole Empire will be greatly added to. With this object in view, the Imperial Economic Conference, of which Canada is a member, in 1923 appointed the Imperial Economic Committee to study the possibilities for doing something to stimulate marketing within the Empire. As a result of their first and subsequent meetings, the Empire Marketing Board was created.

The Empire Marketing Board as constituted is an official non-political body, and the membership is so arranged that, though limited for the sake of efficiency, no part of the Empire is unrepresented, and its chief function is that of advisor to the Secretary of State for Dominion Affairs in the administration of the annual vote of \$1,000,000 as granted by the Parliament of the United Kingdom. The Imperial Economic Committee and the Empire Marketing Board are closely related, partly because the Empire Marketing Board is charged with the endeavor to give effect within the terms of the Vote, to many of the recommendations of the Imperial Economic Committee and partly because certain men are members of both bodies.

The Committee proposed in the first instance that a very considerable proportion of the grant should be devoted to promoting Empire buying in the United Kingdom, and a minor portion reserved for the assistance of research. Later, the Board modified in the direction of an increased expenditure for the assistance of research.

The value of consumer publicity early engaged the attention of the Board and it was with the object of creating consumer interest in the matter of Empire trade expansion within, that the Board at the outset dealt with a publicity problem, both novel and difficult. The Board appreciated the fact that its main function in the field of publicity was to create a background against which individual governments, or countries, or trading interests could throw into relief the claims of those commodities in which they were interested. This principle has been permanently adopted. Thus, while the Board may draw attention in general terms to the proper seasons to particular varieties of Empire produce, it is not called upon to undertake or subsidize special campaigns on their behalf. The effect has been that the Board has been engaged less in furthering directly, the sale of individual articles of Empire produce, than in creating a consciousness of Empire among a public that might thus be led to respond more freely to the direct appeals of other advertisers. Already there are evident signs up and down Great Britain of a fresh and growing interest in the possibilities of Empire development and trade, and as well, an obvious preference for Empire products where quality and cost are in proper relation.

Consumer interest in the work of the board is now growing with amazing rapidity. Within recent months, approximately 15,000 schools have applied to the Secretary to be placed on the regular mailing list to receive the Board's posters as often as they are issued. Already 1,140 poster-boards or frames have been erected in different parts of the country, and a further 160 frames are in course of erection. To indicate the interest and value placed in this Empire publicity scheme, we cite the British Electrical and Allied Manufacturers' Association, which has made proposals involving the erection of sixty advertising frames in their factories, so that the Board's objective may be displayed for the benefit and education of the vast army of industrial workers. Moving picture centre panel poster frames now being considered for erection at the chief railway stations in London, so as to reach the eyes and arrest the attention of the millions moving about in the streets, and out of the largest single consuming area in the world and Empire.

The effectiveness of such an elaborate publicity effort in promoting buyer action is quite apparent. Nev-

ertheless, it should be repeated, that the whole scheme would be worse than futile if in urging the policy of voluntary preference, we would be advertising inferior goods and this we would be doing, if the goods or products on offer from Empire sources are not adequate, both in quality and volume to meet whatever competition they are likely to encounter.

Those of us who have been privileged to visit the leading market centres in Great Britain and those of us who have had to do in a practical way with the sale of Canadian products in the British market, realize how sound is the idea that quality and volume represent the only conditions on which Empire produce may be given a privileged place in the consuming centres of Great Britain. And further, it is necessary that in the matter of volume, the same shall be uniform and regular. None understands better than Canada, with her long winter months and her comparatively short growing season, the difficulties encountered in developing uniform product volume. Nevertheless, regularity of volume is essential to obtaining voluntary preference, and we have to face the issue as it stands; and we have successfully overcome greater difficulties in times past.

The Empire Marketing Board as an aid in fostering Empire trade, deserves our full support and with the widening of the scope of its activities from time to time its growing influence on our trade opportunities make it the more essential that we should give the work of this Board representing the efforts of in Imperial Economic Committee on our behalf, the full measure of our support. On the recommendations made by the Empire Marketing Board to the Committee, beneficial legislative enactments are likely to be made from time to time and it is important that our agricultural and commercial interests keep themselves fully posted on the work of this Committee.

Poison For Insects

Both Liquid and Dry Applications Are Recommended

Practically all plant insects that live by eating the leaves can be destroyed by poisoning. In his new bulletin No. 99, of the Department of Agriculture, at Ottawa, "Insects of the Flower Garden and Their Control," Mr. Arthur Gibson the Dominion Entomologist, recommends both liquid and dry applications. When Paris green is used, 4 ounces of Paris green and half a pound of fresh lime are sufficient for forty gallons of water. Where only small quantities are needed a teaspoonful of Paris green and the same quantity of lime are the proper quantities for a pail of water. For dry applications a pound of Paris green should be mixed with 20 pounds of land plaster, slaked lime, or other perfectly dry powder. This preparation should be dusted on the plants early in the morning while the dew is still on. Arsenate of lead is in some ways preferable to Paris green because it does no injury to the foliage and will not wash off easily by rains. The powdered arsenate of lead is recommended in the bulletin to be used in the strength of two pounds to 40 gallons of water. When the paste form is used 4 pounds is the proper quantity to 40 gallons of water. For small garden use one tablespoonful of the paste arsenate of lead to a gallon of water is about the proper strength.

Demand For Reaper-Threshers. Implement companies are importing large quantities of reaper-threshers, and indications point to a heavy sale of these this year. It is believed that this type of harvester will be used to a greater extent this year.

The Bible contains no words of more than six syllables.

"Jump! There is a mattress at the bottom."—Kasper, Stockholm.

WORLD HAPPENINGS
BRIEFLY TOLD

Royal Canadian Mounted Police in all parts of Saskatchewan are carrying on a vigorous campaign to remove firearms from the possession of aliens.

The International peace congress at Warsaw ended its session by strongly emphasizing the conference's appreciation of the Kellogg proposal to outlaw war.

Mining striking in Manitoba for the first six months of this year reached a record-breaking figure, according to the monthly statement of the Federal Recording Department.

His Majesty King George, is giving up Abercrombie Castle, which he and his two predecessors, King Edward and Queen Victoria, have had on lease for about eighty years.

A. H. Gee, Ph.D., prominent young Canadian scientist of Toronto and Yale universities, has been appointed assistant professor in the University of California. Dr. Gee is only in his middle twenties.

Negotiations for amalgamation of the Marconi and Eastern Telegraph Companies are reported to be coming to a head and an announcement is expected shortly it is understood. The negotiations include the government owned Imperial Radio it is said.

Dr. Duncan Campbell Scott, deputy superintendent general of Indian affairs, has been appointed by order-in-council to be one of the six commissioners of the Northwest Territories, in place of John W. Greenway, commissioner of Dominion lands, who died some time ago.

A bylaw passed by the Montreal City Council, in 1870, prohibiting unnecessary noises has been invoked in court. A firm of local music dealers was fined \$10 and costs for creating unnecessary noises by means of an outside gramophone apparatus.

Market For Alberta Wool

Samples Sent To Japan Were Found Satisfactory

Japan may become one of Alberta's important wool markets. The agricultural Department, at Edmonton, has been advised by K. Miyajishi, of Kobe, Japan, that samples of Alberta wool sent to Japan on request some time ago had been inspected and tested and that the results are highly satisfactory.

Mr. Miyajishi says that the Japanese Government intend to import wool of the same quality from this province and that it is likely a number of orders will also be given this year by private firms. Further information is asked for as to how many hundred tons can be supplied.

The possible establishment of trade connections with the Japanese market in wool follows a series of inquiries covering the past year or more.

K. Kanda, director of experimental farms for the Manchurian railway, looked somewhat carefully on his recent visit here, into the possibility of doing some business in this line, and Capt. T. Kawakami, who spent a month in Alberta last year, was also greatly interested in the question of wool, among other western products for trans-Pacific import.

Hungarians Organize

The Hungarian Farmers' Association of Saskatchewan was organized with a view to assisting the 40,000 Hungarians now living in this province. Fritz Lelshaker, of Horizon, was elected president. Headquarters of the organization will be in Regina.

Courtship—"Oh, if he'd only go home!"

Marriage—"Oh, if he'd only come home!"

A red sunrise, with clouds lowering later in the morning indicates rain.

"Have you a book called 'How to Fight the Increasing Cost of Living?'"
"Yes, but it has gone up in price."
—Pete Mele, Paris.

Farmers' Marketing Tour

Canadian National Railways' Tour To Great Britain and Denmark, 1928

(Continued.)

Before leaving for Denmark it was our privilege to lay upon the base of the Cenotaph, in Whitehall, a wreath of poppies in tribute to the Empire's Glorious Dead. We marched from Horseguards Avenue to the Cenotaph escorted by mounted and foot police. The wreath bore the arms of every Province, and was carried by Mr. William Guild, of Kenora, Manitoba, and Mr. E. F. Augustine, of Alvinston, Ontario, both of whom had lost sons in the war. Reverently they laid it at the foot of the stone while we stood bare-headed and in silence. This was our most precious duty, our proudest task, the memory of which, whatever else in this tour may be forgotten, can never fade.

We had time before entraining for Harwich to see the Houses of Parliament and Westminster Abbey. One of the most striking features of the beautiful Parliament Buildings is the towers. The Victoria Tower above the royal entrance is said to be the loftiest square tower in existence. The site of the Houses of Parliament was occupied by an ancient palace which from Edward the Confessor to Henry VIII, was the chief London residence of the reigning sovereigns. The present buildings date from between 1840 and 1850 and cost \$15,000,000. They cover eight acres and contain 1,100 rooms and two miles of passages.

We passed through both Houses. The House of Lords is much more ornate than the House of Commons. At one end are the thrones of the King and Queen and at the other end the state chair of the Prince of Wales. In the Commons we were shown the Speaker's chair, and places occupied by Mr. Baldwin, Mr. Churchill, Mr. Ramsay MacDonald, Mr. Lloyd George and other Front Benches of the three parties.

Westminster Hall, dating from William Rufus, is particularly memorable as having been the scene of the trial of Sir William Wallace, Charles I., Warren Hastings, and the Seven Bishops. We saw the brass marking the spot where the ill-fated monarch sat during his trial, also where the bodies of Edward VII. and William Ewart Gladstone lay in state.

There is no nobler building, nor one that visitors from Overseas could desire more than Westminster Abbey. It is built in the form of a cross, 513 feet in length and 200 feet wide across the transepts. Every English King since Edward the Confessor in Westminster Abbey. The mortal remains of kings, soldiers, sailors, statesmen and of illustrious men in every walk of life rest beneath its flagstones, and it contains the grave of the Unknown Warrior. The coffin rests in soil brought from the battlefields.

The beauty of the Abbey, no less than its historical associations, filled us with wonder and awe. The Chapel of Henry VIII, forming the eastern end is the finest example in the land of the Tudor Gothic style of architecture. A superb fan tracery vaulting of matchless beauty is its crowning glory. Within the walls of the Chapter House, an octagonal room of noble proportions, the House of Commons was born more than 500 years ago. Near the Chapter House is the Chapel of the Pyx with the seven-locked door where the king's treasure used to be kept and on the door human skin still adhering affords gruesome evidence of the days when punishment was not by light as now.

In the Chapel of Edward the Confessor we saw the Coronation Chair and Stone of Scone, said to have been the Coronation Stone of Scottish kings from time immemorial, but carried off by Edward I. in 1297, where the tomb of five kings and six queens in this chapel and the mutilated shrine of Edward the Confessor, erected by Henry III. in 1290, originally a golden shrine decorated with jewels and golden images of the saints. Queen Elizabeth and her sister, Mary II, lie side by side on the north side of the Henry VII. Chapel.

Little did we think as we gazed at the tombs of the great, that before we returned to Denmark there would be brought into the Abbey the body of the Empire's best beloved soldier, or that in Scotland we should lay our humble tribute on his tomb!

Our four days' itinerary in London completed, we left in the evening for Harwich to embark on the motor ship "Jylland," pronounced mercifully not as it is spelt but as "Yooland." Again fortune favoured us for in this spick and span ship we had a perfect crossing over the usually ruffled North Sea. No time was lost at Esbjerg, for before 11 p.m. we were in our pullman berths en route for Copenhagen, most of us too sleepy to hear the train move on and off the rail ferries as we crossed the Great and Little Belts which interrupt the journey. By eight a.m. we were settled in our new quarters, the Hotel Cosmopolite, sensing that spice of adventure which seems inseparable from a foreign land.

But we did not feel foreign long in Denmark. The keenness and dryness of the air reminded us of Western Canada. Here too was a northern people who appreciated—stoves! Nevertheless we were not prepared for the welcome, the brotherly welcome Mr. Hogsbro Holm, secretary of the General Agricultural Council, tendered us on the Council's behalf nor for the frank discussion on Danish agriculture which took place, followed, to our astonishment, by the presentation of a wealth of printed statistics on every department of Danish agriculture. But the frankness and fearlessness of this country were explained—"We are still looking forward to a still keener competition on the world market, but being, as we are, descendants of the old Vikings, we are looking for the

PRINCESS ELIZABETH

Britain's most popular little lady, Princess Elizabeth, daughter of their Royal Highnesses the Duke and Duchess of York.

struggle with joy, and today are glad to shake hands with an able and first class competitor." And we Canadians clapped to a man and woman.

Other interesting features of the meeting were a history of co-operation, questions that were answered by the leading agricultural professors in Denmark, and the vote of thanks proposed in Danish by Mr. C. Christensen, the only Danish born Canadian in the party.

In the afternoon we had the pleasure of viewing Amalienborg Palace, the residence of the Danish Royal Family, Christiansborg Castle and other interesting buildings which tell the story of Denmark's glorious history. Even then we did not forget the business aspect of our tour, for the afternoon was ended by an inspection of the Milk Distributing Depot, Copenhagen.

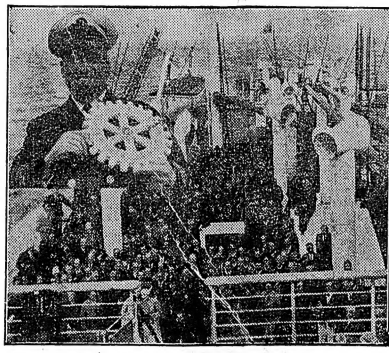

(To Be Continued.)

Western Farmers Are Skilled Operators

Modern Machinery Has Reduced Labor to a Minimum

From a review of agricultural conditions in Western Canada, published by Agricultural and Industrial Progress in Canada, it appears that the western farmer today has developed into a unique figure, far removed from the older conception of the agriculturist. That idea pictured him as a man mighty of brawn and sinew who wrested riches from the soil by large expenditures of muscular toil. Now, the world is told, in the great prairie expanses actual manual labor has been reduced to a minimum, indeed almost eliminated. The farmer of today is a skilled operative and executive, among other things, directing a series of mechanical contrivances that perform all the hard work for him. To this observer and reviewer, no more progressive agricultural territory than Western Canada can be found anywhere, and the progress is method and device may seem to have been attained, change is ceaseless because of the immediate adoption of new machinery developed and calculated to carry out farming operations more efficiently and expeditiously.

DELEGATION OF ROTARIANS

Here is the largest delegation of Rotarians ever to leave Europe for the North American continent, and who chose to travel by the St. Lawrence route and through Canada to attend the 19th Rotary International Convention at Minneapolis. There were 250 in the party, and they represented 14 nations. Inset is Capt. E. F. Summers, commander of the White Star liner "Alberic" holding a China Rotary wheel, presented to him by Rotarians from Czechoslovakia, as a memento of the voyage. The photograph was taken on the Alveric on which the delegation travelled.

SUNDAY SCHOOL LESSON

JULY 15

THE CONVERSION OF SAUL

Golden Text: "Faithful is the saying, and worthy of all acceptance, that Christ Jesus came into the world to save sinners."—1 Timothy 1:15.

Lesson: Acts 9:1-19a; 22:5-16; 1 Corinthians 15:8.

Devotional Reading: Psalm 119:48.

Explanations and Comments

"Saul the Zealot, Acts 9:1, 2—"The But" indicates the contrast between Saul's zeal in advancing the gospel, which Luke has just recorded in Acts 8, and Saul's zeal in retarding it. By means of a vivid metaphor, Luke shows us how Saul's presence brought terror to the hearts of the disciples whom he hunted; "But Saul, yet breathing threats and slaughter against the disciples of the Lord, went unto the high priest." "Breathing hard, out of a threatening and murderous desire, the Greek form there warrants that translation." It is as if Saul were fairly panting, in his effort to give expression to his outraged thoughts concerning the disciples.

From the high priest Saul asked and readily obtained letters to the synagogues in Damascus, which permitted him to arrest believers of Christ, whether men or women, and bring them bound to Jerusalem. At Jerusalem the captives were to be brought before the Sanhedrin for trial. Henry Drummond puts the situation in a striking way: "In the pride of his Pharisee's heart Paul strikes out the idea of reversing the maxim of the Crucified Leader of the hated sect, and go into all the world and suppress the gospel in every creature."

There are similarities between the story of Paul and that of Felix Dzierzinski, the chief of the Red Terror in Russia. He was the organizer of the Soviet Inquisition by which the Bolsheviks maintained their position against their enemies in the first years of their civil war for power. The Outlook said of him: "Incorruptible and implacable, he was the sort of inexorable judge who believed that people must be tortured and executed to strike fear into the hearts of their fellow men or to advance the cause of Communism in Russia and, as undoubtedly he hoped—through the work of the world, in certain aspects Communist fanaticism is like religious fanaticism. One of its most significant products and its most genuine individual and cruel inquisitor, Dzierzinski."

Tragedy Of The Arctic

Esquimo Mother Perishes In Attempt To Save Children From Drowning

A tragedy of the Arctic in which an Eskimo mother sacrificed her life in a vain attempt to save three of her children from drowning was described by Captain Burgess, of the steamer Umanak, just back from a cruise along the Labrador coast. The accident occurred near Rigolet. An Eskimo boy and his two sisters were fishing at the edge of the ice when a large floe broke away and drifted out to sea with the helpless children.

The mother saw the predicament of her children, just as the six-foot current caught the drifting floe and overturned it. The hardy children managed to keep their heads above water by clinging to the ice while their mother launched a leaky boat, the only one available, and with a wooden tub to bale out to the rescue.

In the face of almost insurmountable difficulties the heroic mother took the children from the icy water and started for shore, forced to bale constantly to keep the fragile craft afloat.

Just as safety was almost assured the wooden tub, held by only one hoop at the bottom, fell to pieces in the hands of the bather and before they could reach shallow water the craft sank beneath them. All were drowned.

Erecting Country Elevators

A Busy Season Ahead In Constructing Grain Elevators In Alberta. This summer will witness a great deal of activity on the part of the grain companies as well as the Wheat Pool in the construction of elevators at country points in Alberta to take care of the larger harvests which are expected. Another company which has just announced its intention to enter on a construction program is the Gillespie Grain Company. According to John Gillespie, president, the firm plans to erect six new elevators each with a capacity of 40,000 bushels.

Good For Paving Purposes

By means of actual tests in road construction it has been definitely established that the bituminous sands of Northern Alberta can be successfully employed for paving purposes. As the present supply of these sands is practically exhausted, their presence and use appear to have solved the problem of permanent paving and road construction in the western provinces.

Big Power Development

Development of 39,000 Horsepower on Churchill River is Promised

Initial development of 20,000 horsepower at Island Falls, on the Churchill River, is promised in an announcement made by the Churchill River Power Co., Ltd., a company allied with the Whitney interests in developing the Flin Flon mining properties and which supply power to the Flin Flon.

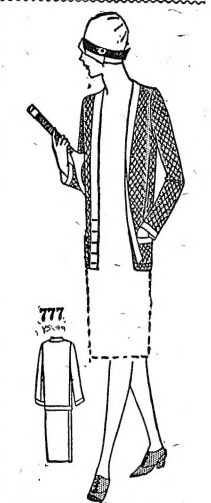

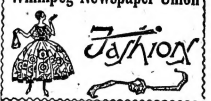

While the initial development is not on the scale of some of the bigger power projects on the continent, even in its first stages, the power plant at Island Falls will be by far larger than any now existing in Saskatchewan.

At present Regina has the largest power plant in Saskatchewan, with a capacity of 26,500 horsepower. The one to be built at Island Falls, even at the start, could supply any two cities in Saskatchewan with all power needs and could supply Moose Jaw, North Battleford, Prince Albert and Saskatoon. The 39,000 initial horsepower will represent 24,000 kilowatts.

Under terms imposed by the Saskatchewan government, the federal government, having referred the proposition, the Churchill River Power company must reserve one-sixth of the total power developed for use of the public in Saskatchewan and sell that reserve to the public consumer at as low a cost as charged any company for like use as the reserve power must be supplied as and when required.

The Churchill River Power Company now has a registered office in Regina and from that office has issued an official warning that land in the vicinity will be flooded and that protests, if any, should be filed on or before July 15, noon.

Subject To Change

"I want a pair of spectacles," said the countryman to his oculist.

"Ah, age coming on and eyes failing, eh?"

"No," replied the man. "My eyes at 55 are just as good as ever they were, but—dang it all—the light nowadays isn't the same."

ITALIAN AIRMEN ESTABLISH NEW DISTANCE RECORD

Rio Janeiro, Brazil.—A new distance record for sustained flight was completed "man" by Captain Arturo Ferrarini and Major Carlo P. Del prete, Italian airmen, landed on a little beach ten miles north of Natal, Brazil, some 4,600 miles from their take-off at Montecello Field, Italy. They brought their big seaplane, Savoia-64, in which they had previously established a world record for duration flight, to the land after a flight which took them across the Mediterranean, through the Strait of Gibraltar and then southwest over the Atlantic via the Cape Verde Islands.

An hour and twenty minutes after landing the fliers resumed their flight, heading for this city, but were later forced to descend again at Natal.

Stormy weather with heavy clouds put the fliers in peril in the last hours of their effort and radio reports received here indicated that they had difficulty in maintaining their bearings after they reached the coast of Brazil.

They were sighted over Port Natal at 4:05 p.m. and were then believed to be heading for Pernambuco. By three hours and 45 minutes later they came down ten miles north of Natal at Point Genipabu. Poor visibility is believed to have caused their indecision.

The failure of the two intrepid Italians to wind up their flight at Rio Janeiro brought disappointment to a huge crowd of spectators in this city. Word that the fliers had gone beyond Natal, flying to the south, coupled with absence of any report of their landing near Pernambuco spread rapidly through the capital and brought throngs to the water front.

Asks Help For Children

Widow of Captain Hinchcliffe Says They Are Unprovided For
London, England.—The Daily Mail published a complaint from the widow of Captain Walter G. R. Hinchcliffe, pilot for the Hon. E. S. Mackay on her ill-fated trans-Atlantic flight, saying that her two children were unprovided for. The establishment of a trust fund to reduce the British national debt in memory of Miss Mackay, by her parents, Lord and Lady Incheape, called forth the letter.

Mrs. Hinchcliffe argued that while there was no legal obligation on Lord Incheape, there was a moral one, because the whole scheme of the flight came from Miss Mackay who hired Hinchcliffe. She said she had written four times to Lord Incheape telling him of her position and need. He replied non-committally, to the first letter, but she received no response to the others.

The government has already accepted the trust fund of \$2,500,000, which will be left to accumulate for 10 years and then be applied to the debt.

Wireless Merger

Beatty Makes Important Submissions to British Government in Report

London, England.—The Daily Mail says that President E. W. Beatty of the Canadian Pacific Railway, has made important submissions to the British Government embodying Canadian views concerning the rumored merger of wireless and cable companies to operate imperial communications. Until these recommendations are sifted out, delay in publishing the terms of the settlement is inevitable, says the newspaper. No confirmation of these statements is obtainable but Canadian Press understands that any modification of terms now under consideration that might be made would likely be of small importance.

Problem For Ontario

Toronto.—The spread of communist literature throughout the school sections of Northern Ontario continues unabated, according to officials of the department of education at Queen's Park. Departmental officials are making fresh inquiries regarding the activity of the communists involved in preparation for any action the prime minister may see fit to take on his return from Europe.

Goes Over Niagara Falls

Jean Lussier Successfully Performs Daring Stunt

Niagara Falls, N.Y.—For the third time in history man conquered the mighty Niagara when Jean A. Lussier, 36-year-old French-Canadian now living at Springfield, Mass., went over the Horseshoe Falls on the Canadian side in a specially constructed rubber ball while a crowd of 150,000 people lining the river banks on either side, cheered and applauded him.

The start was made from Cayuga Island, about three miles above the falls, at 2:30 o'clock and Lussier was rescued from the bridge edge below the falls at 3:20 o'clock by William Hill, daring riverman, alone in a rowboat. At first it was feared the giant ball might be carried down stream into the rapids. Lussier plunged over the brink at three o'clock.

When Hill reached the ball it was right side up and it was a matter of only a few minutes until it was towed to shore and opened.

The first to greet Lussier with a resounding smack on his cheek was his sister, Madame J. P. Cauteaux, of Sherbrooke, Que.

The only bruise Lussier suffered in his perilous journey over the minor nature. There was a small mark on his right temple, another on his left shoulder, and a spot on his left shoulder blade, all received, he said, in the terrific bouncing while his strange conveyance was passing through the rapids above the falls.

Asked concerning his sensations while going over the precipice, Lussier said: "I didn't even think. It happened too fast."

An Interesting Exhibit

Improved Methods of Marketing to Be Demonstrated at Western Fair

Winnipeg.—With the object of bringing directly before the producers some of the lessons learned during the Canadian National Railways marketing tour of the British Isles last winter, the Dominion Department of Agriculture is preparing an exhibit to be shown at the fairs at Brandon, Calgary, Edmonton, Saskatoon and Regina during July.

The exhibit will be conducted in a car which the Canadian National Railways are providing and lecturers and demonstrators will be in attendance throughout. The exhibit will be in Brandon for the period of the fair. From there it will go to Calgary, July 9 to 14; Edmonton, July 17-21; Saskatoon, July 22-28 and Regina, July 29 to August 4.

Among the matters which the exhibit will stress will be the importance of marketing only the highest quality products in the British Isles and all the standardizing of grades and improving methods of marketing Canadian agricultural products so that they can meet more efficiently the intense competition of the Old Country markets. In addition to the lecturers and demonstrators provided by the Government, there will be in attendance at the exhibit at each point visited two or more of the farmers from that district who made the trip last year.

The government has already accepted the trust fund of \$2,500,000, which will be left to accumulate for 10 years and then be applied to the debt.

Fraudulent Currency

Fake American Bills Being Circulated in Winnipeg

Winnipeg.—United States wires a few days ago carried warnings of the currency of fraudulent \$20 bills. Some of them have turned up here. Several merchants have been victimized in the last few days by the fake notes.

Bills used here are valid one dollar bills cleverly changed to give the appearance of the note of larger denomination.

Police fear an influx of the fraudulent notes during the next week when the Norse convention will draw hundreds of United States visitors. Merchants have been warned.

Serious Drought In Mexico

Some Sections Have Had No Rain For a Year

Mexico City.—Cattle are dying, crops burning up and farmers are facing heavy losses and some of them ruin, in many parts of Mexico as the result of one of the worst droughts the country has ever known.

Conditions are worse in the central states, the granary of Mexico, where the corn crop is almost ruined, and in the cattle and grazing regions to the north between Mexico City and the border. Some of this territory has had no rain to speak of for a year.

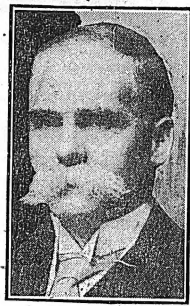

USE CASH FROM GRAIN OVERAGES FOR RESEARCH

Ottawa.—The Federal Government has decided to devote the entire amount of money resulting from the overages in Canadian terminal elevators toward research in connection with grain problems. In making this announcement, Hon. James Macleod, minister of trade and commerce, stated that the decision had been made in view of the ever increasing number of problems respecting the production and marketing of Canadian grain.

The expenditure of monies resulting from overages will be under the direction of the National Research Council and the order-in-council relative to the disposal of such monies along these lines has been passed. Expenditures will be utilized not only to subsidize and extend the various researches now under way in universities and research laboratories, now conducting such work, but also to make possible research on many pressing problems for which money heretofore has not been available.

In the opinion of the government, monies accruing from the grain trade should, as far as possible, go toward the solving of the problems of that trade. Among the most important problems in connection with which research has been going on for some time past is that of combating rust. The amount of money from overages in Canadian terminal elevators at the disposal of the government for the purposes mentioned is \$219,000.

SLATED TO RETIRE

Hon. Frank Oliver, Dominion railway commissioner, appointed to the board in 1923, is slated to retire this fall, it is reported, because he has reached the age limit of 75, even though he will have served only one-half of his ten-year period.

Food Shortage In Russia

Soviets Buying Huge Amount of Grain in Baltic

London, England.—Huge purchases of wheat on the Baltic Exchange by Soviet Russia are reported in London, traders here expressing the opinion that the movement indicates a severe scarcity of food in Russia.

The quantity in Liverpool for spot amounts to between 150,000 to 200,000 tons, and Baltic London brokers expect Russia to buy almost as large a quantity again.

The prices agreed to without negotiations thus far have been uniformly as much as 50 cents per quarter above the market rate, which is felt to indicate a tremendous immediate demand for grain.

London brokers say they have reports of long bread queues and a painful shortage of food in Russia which, before the war, was one of the world's largest exporters of grain.

Russia has not bought such supplies of wheat since the winter of 1919-1920.

Natural Resources Question

Conference at Ottawa Has Been Satisfactory, Says Manitoba Premier

Ottawa.—The conference has been "satisfactory," declared Premier John Bracken, referring to the deliberations that have been in progress here between members of the Manitoba Government and the Federal Cabinet.

"The subjects discussed and the conclusions arrived at will have to be communicated to the provincial government and until they have been consulted nothing can be said at present."

The purpose of the conference was to discuss the question of the return of the natural resources to the province of Manitoba and to explore the various problems which this matter involves.

Weekly Newspapermen Meet

Officers for Coming Year Elected at Edmonton Convention

Edmonton.—H. B. Anslow of Campbelltown, N.B., was elected president of the Canadian Weekly Newspaper's Association at the concluding session of the annual convention here. E. Roy Saylor, of Renfrew, Ont., was re-elected secretary-treasurer.

Invitations for next year's convention were received from the maritimes with Halifax or St. John as the venue, and from Regina and London, Ont. No decision was arrived at, the choice being left in the hands of the executive.

Additional officers elected were as follows:

Directors: Maritime Provinces—H. S. Anslow, Windsor, N.S.; Don Fraser, New Glasgow, N.S.

Quebec.—George Legge, Granby; A. Girouard, Thetford Mines.

Ontario—Lorne A. Eedy, St. Mary's; A. W. Marsh, Amherstburg; P. A. J. Dawes, Carleton Place; J. A. MacLaren, Barrie; George Mitchell, Hanover Port; George Lake, Timmins; Fred Elliott, Alliston; W. A. Dry, Dunnville; D. Williams, Collingwood.

Manitoba—J. L. Cowie, Carberry; W. V. Udall, Boissevain.

Saskatchewan—Cameron McIntosh, Ratzliff; S. J. Dorman, Alameda; Donald Dunbar, Estevan.

Alberta—Charles Clark, High River; Fred Turnbull, Red Deer.

British Columbia—R. E. White, Kamloops; C. A. Barber, Chilliwack.

Manitoba—J. L. Cowie, Carberry; W. V. Udall, Boissevain.

Saskatchewan—Cameron McIntosh, Ratzliff; S. J. Dorman, Alameda; Donald Dunbar, Estevan.

Alberta—Charles Clark, High River; Fred Turnbull, Red Deer.

British Columbia—R. E. White, Kamloops; C. A. Barber, Chilliwack.

Manitoba—J. L. Cowie, Carberry; W. V. Udall, Boissevain.

Saskatchewan—Cameron McIntosh, Ratzliff; S. J. Dorman, Alameda; Donald Dunbar, Estevan.

Alberta—Charles Clark, High River; Fred Turnbull, Red Deer.

British Columbia—R. E. White, Kamloops; C. A. Barber, Chilliwack.

Manitoba—J. L. Cowie, Carberry; W. V. Udall, Boissevain.

Saskatchewan—Cameron McIntosh, Ratzliff; S. J. Dorman, Alameda; Donald Dunbar, Estevan.

Alberta—Charles Clark, High River; Fred Turnbull, Red Deer.

British Columbia—R. E. White, Kamloops; C. A. Barber, Chilliwack.

Manitoba—J. L. Cowie, Carberry; W. V. Udall, Boissevain.

Saskatchewan—Cameron McIntosh, Ratzliff; S. J. Dorman, Alameda; Donald Dunbar, Estevan.

Alberta—Charles Clark, High River; Fred Turnbull, Red Deer.

British Columbia—R. E. White, Kamloops; C. A. Barber, Chilliwack.

Manitoba—J. L. Cowie, Carberry; W. V. Udall, Boissevain.

Saskatchewan—Cameron McIntosh, Ratzliff; S. J. Dorman, Alameda; Donald Dunbar, Estevan.

Alberta—Charles Clark, High River; Fred Turnbull, Red Deer.

British Columbia—R. E. White, Kamloops; C. A. Barber, Chilliwack.

Manitoba—J. L. Cowie, Carberry; W. V. Udall, Boissevain.

Saskatchewan—Cameron McIntosh, Ratzliff; S. J. Dorman, Alameda; Donald Dunbar, Estevan.

Alberta—Charles Clark, High River; Fred Turnbull, Red Deer.

British Columbia—R. E. White, Kamloops; C. A. Barber, Chilliwack.

Manitoba—J. L. Cowie, Carberry; W. V. Udall, Boissevain.

Saskatchewan—Cameron McIntosh, Ratzliff; S. J. Dorman, Alameda; Donald Dunbar, Estevan.

Alberta—Charles Clark, High River; Fred Turnbull, Red Deer.

British Columbia—R. E. White, Kamloops; C. A. Barber, Chilliwack.

Manitoba—J. L. Cowie, Carberry; W. V. Udall, Boissevain.

Saskatchewan—Cameron McIntosh, Ratzliff; S. J. Dorman, Alameda; Donald Dunbar, Estevan.

Alberta—Charles Clark, High River; Fred Turnbull, Red Deer.

British Columbia—R. E. White, Kamloops; C. A. Barber, Chilliwack.

Manitoba—J. L. Cowie, Carberry; W. V. Udall, Boissevain.

Saskatchewan—Cameron McIntosh, Ratzliff; S. J. Dorman, Alameda; Donald Dunbar, Estevan.

Alberta—Charles Clark, High River; Fred Turnbull, Red Deer.

British Columbia—R. E. White, Kamloops; C. A. Barber, Chilliwack.

Manitoba—J. L. Cowie, Carberry; W. V. Udall, Boissevain.

Saskatchewan—Cameron McIntosh, Ratzliff; S. J. Dorman, Alameda; Donald Dunbar, Estevan.

Alberta—Charles Clark, High River; Fred Turnbull, Red Deer.

British Columbia—R. E. White, Kamloops; C. A. Barber, Chilliwack.

Manitoba—J. L. Cowie, Carberry; W. V. Udall, Boissevain.

Saskatchewan—Cameron McIntosh, Ratzliff; S. J. Dorman, Alameda; Donald Dunbar, Estevan.

Alberta—Charles Clark, High River; Fred Turnbull, Red Deer.

British Columbia—R. E. White, Kamloops; C. A. Barber, Chilliwack.

Manitoba—J. L. Cowie, Carberry; W. V. Udall, Boissevain.

Saskatchewan—Cameron McIntosh, Ratzliff; S. J. Dorman, Alameda; Donald Dunbar, Estevan.

Alberta—Charles Clark, High River; Fred Turnbull, Red Deer.

British Columbia—R. E. White, Kamloops; C. A. Barber, Chilliwack.

Manitoba—J. L. Cowie, Carberry; W. V. Udall, Boissevain.

Saskatchewan—Cameron McIntosh, Ratzliff; S. J. Dorman, Alameda; Donald Dunbar, Estevan.

Alberta—Charles Clark, High River; Fred Turnbull, Red Deer.

British Columbia—R. E. White, Kamloops; C. A. Barber, Chilliwack.

Manitoba—J. L. Cowie, Carberry; W. V. Udall, Boissevain.

H. B. ROAD TO BE COMPLETED FOR SEASON 1930

Ottawa.—That the Hudson's Bay Railway will be completed to Churchill for the season of 1930, is the confident belief of the engineers. It is unlikely, however, that the harbor itself will be completed as early as the railway line and a real test of the new northern route to the sea will not be possible for three or four years.

Some 1,500,000 cubic yards of sand, gravel and boulders must be dredged from the bay before ocean-going vessels can dock at Fort Churchill and take on cargoes of grain and other products of Western Canada destined for the world's markets.

Aids to navigation, direction finders and terminal elevators and docking accommodation for half a dozen vessels loading or unloading simultaneously must be established before the success or failure of the Bay route as a factor in Canadian foreign trade and transportation can be determined.

When the terminal of the railway was changed from Port Nelson to Fort Churchill an additional 154 miles of track was involved, the distance to Churchill being that much greater. The engineer anticipates that eighty miles of that will be graded and steel laid by December of this year, while by December, 1929, steel will be laid right to Fort Churchill and the whistle of the locomotive will be heard across the Bay. This will enable the government to rush supplies by rail for the development of the harbor.

In connection with the excavation work for the docks and navigation channels one dredge was launched in Montreal a week ago and another will take the water next week. These dredges will be towed to Churchill in August and should report there by September, but they will not be operated until next year. In addition, a self-propelled hopper barge was launched at Collingwood recently and it will go north with the dredges in time for operations next year.

The department has purchased one tug and leased a second tug called "The Dainty" from the Irish Free State for towing purposes in connection with the barges. The government is constructing a temporary dock out of local timber and the permanent docks will be constructed when the boulders gravel have been dredged out. In the meantime supplies will be unloaded by lighter. There is deep water right across the bay except at the site of the docks.

The range-finding stations are being established by the Department of Marine and Fisheries at Resolution Island and 'Cape Hopes Advance, for the purpose of giving directions to incoming vessels entering the Hudson Strait.

Planning Farm

Credits System

Legislation Passed Two Years Ago Soon to Become Effective

Ottawa.—It is announced at the Finance Department that within a very short time effect will be given to the legislation passed two years ago and made contingent upon provincial adherence, establishing a system of farm credits. By the legislation then passed the way was paved for Federal financing of the system in the province which went in on the plan. Ontario, with a scheme of its own, will not do so, nor will Saskatchewan, which is in the same position, while Quebec has not decided as yet.

Four provinces, however—Manitoba, Alberta, British Columbia and Nova Scotia—subscribe to it. In consequence, the project will go ahead. A Loan Commissioner will be appointed, and a central organization, but not a large one, will be established at Ottawa.

The greater part of the administration, however, will be in the hands of the provinces.

Fire In B.C. Mine

Ferne, B.C.—Fire in the tipple of the Corbin Coals, Ltd., at Corbin, B.C., completely destroyed the structure.

This disaster will, it is believed, cause the closing down of that colliery and throw a couple of hundred men out of work. No estimate of the loss has been made.

The Lister Institute of England is experimenting with a number of guinea-pigs to discover health value of different varieties of apples.

SAY IT WITH SONGS

Probably what has ever been the largest crowd to say goodbye to a departing individual, omitting royalty, was recognized at the North Toronto Station of the Canadian Pacific Railway, recently when two thousand members of the Toronto Exhibition choir sang "Bon Voyage" to their leader, Dr. H. A. Fricke, on his leaving for England and Europe.

About an hour before the departure of the train, the station was densely packed. Eleven special street cars and one hundred automobiles were used for the transportation of the group.

Drawn up at the platform the two brass and choir members sang Dr. Fricke started on its eastern journey.

Doing Canada A Service

Financial Times Of London Gives Dominion Most Publicity

Canada has a very good friend in The Financial Times of London - daily with the largest circulation of any financial journal in the world. On a number of occasions during the last few years it has devoted a great deal of attention to this Dominion and Canadian affairs under all heads. Such well-known financial experts as Mr. Anthony Mullins, and Mr. Keith Morris, both thoroughly conversant with this country, have paid fine tributes to our progress and have pointed out that possibilities for investment here are practically unlimited. Not long ago the journal in question issued a large supplement devoted to "Canadian Resources" and it has just completed a second on this series. It is a thirty-two page affair and has been produced under the editorship of Mr. R. J. Barrett, the supplement giving a comprehensive survey of the position of Canada in all its outstanding aspects. It contains articles by Hon. Charles Stewart, Hon. James Macdonald, Mr. E. W. Reilly, Sir Henry Thornton and other well-known public men and commercial leaders. In this way the editor sums up the Dominion in the economic sense: "It is now realized as never before that no other country in the world offers such advantages to the settler, the capitalist, and the industrialist as the Dominion does. This is the view of the business world. It is in striking contrast with some of those expressed by political partisans in this country." - Victoria Times.

Shopping At Home

Marked Shrinkage Shown In Trade Of Mail Order Houses

Those who have followed the mail order business in the past few years have been aware of the falling off of this type of merchandising. The advent of good roads, motor buses, automobiles, etc., have enabled the farmer to move rapidly at small cost, so that instead of making purchases by mail he is doing his buying direct. It may be a somewhat daring prediction, but it seems as if the days of the mail order business are numbered. If reports are true there has already been a marked shrinkage in the trade of the mail order houses. People are learning that it is not altogether satisfactory to buy a pig in a poke. The auto has made it easy for people in the country to drive to town or city and see what they are buying, and this is becoming more of a custom. The more aggressive attitude of town merchants offers opportunities and satisfaction to the housewives who enjoy chasing bargains. The advertisements in the local weeklies are perused with as much zest as used to be the case with the "reds" of the city department stores.

It will soon be superfluous to appeal to people to shop at home. More than one visitor here has stated that they can shop to better advantage, in some things, in the small town rather than in the city. The town merchants should be thankful to the opportunity that the change in public sentiment brings to them. - Listowel Banner.

Seedless Cucumbers In B.C.

Production of a comparatively seedless cucumber is claimed by J. B. Steele, operator of a market greenhouse at Hazelmore, B.C., by a process in which he has been specializing. The cucumbers are protected from bees, attain a phenomenal growth, and produce very little seed.

Collection Governed Sermon

Said the minister: "I have had many complaints lately about the length of my sermons. Hereafter the collection will be taken and counted before I begin to talk. The smaller the collection the longer the sermon."

"Then your husband is going in for politics?"
"What else can he do? He is no good at business!" - Pete Mole, Paris.

W. N. U., 1741

ANOTHER WORM TURNS

Railway Company Presents Automobile With Bill For Damages

Last November Tony Straber, of Chicago, driving his nice new automobile, disputed the right-of-way over a level crossing with a Grand Trunk Railway train. Tony was unhurt, but his car landed in a messy pile, and never was much good thereafter.

All over Canada and the United States automobiles have been doing this thing persistently, even though with remarkably small success. We do not recall by instance where an automobile got the better of a steam locomotive. The results of such encounters are written with deadly monotony in terms of dead and injured. Not many are as fortunate as Tony, who lost only his property.

At any rate Tony scrambled out of the ditch and proceeded to tell the engineer a few things about his engine, which ceased his feelings and did the Grand Trunk no harm. Now the railway company has got in a last word. It has sent Tony a bill for \$29.15 for damage done to the locomotive, and the procedure seems to be sound and reasonable.

We find extreme difficulty in working up very much indignation over the perils which surround motorists at rural level crossings. Literally every accident at such a place is preventable by the simple exercise of reasonable precautions. No case is known of a locomotive departing from its fixed course to pursue an automobile up the road. Only the motorist can prevent level-crossing accidents and he - or she - only by coming to a full stop in plenty of time. The driver who approaches an unprotected crossing in anything less than absolute certainty that there is no train approaching is flirting with sudden death.

General adherence by the railways to the precedent set by the Grand Trunk might be not without effect. - Ottawa Journal.

No Question About It

Prince Of Wales Says His Neck Is His Own

The disregard of the Prince of Wales for his own person was revealed by an incident at a recent hunt meeting. The Prince arrived at the meeting by automobile, and wishing to escape the crowds parked his motor car at a farm some distance away. Curious enough, he was not recognized by the farmer, and when, after the meeting, Wales went to claim the automobile, the following conversation took place:

"You been over to the steeplechase, I reckon," said the farmer. The Prince assented.

"Prince of Wales was ridin', they tell me," said the farmer. The Prince assented.

"Did he win?" asked the farmer. "No," said the Prince, "he had a fall."

"Ah," said the farmer, "one of these days he'll break his neck, you mark my words."

"Well," replied the Prince, "it's his own neck; so it doesn't matter, does it?"

Is World's Greatest Linguist

The greatest linguist living might be Sir George Grierson, who has just completed the monumental linguistic survey of India, on which he has been engaged for 25 years. A few days ago he was entertained to luncheon in London by the Royal Asiatic Society. Lord Birkenhead, proposing the toast of "The Survey," said: "Sir George will never lack conversational matter, being acquainted, as he is with 179 languages and 554 dialects."

Sculptures In Soap

Sculptures in soap are being shown at the Anderson Galleries, New York. This is the fourth annual exhibition of such work. There are 4,000 statues of soap carved by professional sculptors as well as amateurs from all parts of the United States, Canada, France and China.

Lady Customer: "I want a neat and trim-looking pair of shoes, but they must have plenty of room in them."

Salesman: "Yes, I know just the kind you want - large inside but small outside."

"Is there anything emptier," the Detroit News plaintively asks, "than an empty fountain pen?" Well, out in the country a mile from anywhere, there is the empty gasoline tank.

Why does the man with a pie appetite seldom have a pie stomach?

To insure a good time wherever you go, take it with you.

The Sap-Sucking Insects

These Pests Can Be Eradicated Only By Applying A Spray

Some of the most troublesome insects of the garden take their food in the form of juices which they suck from the leaves and tender stems. These include the plant lice, white flies, and scale insects. Poisons usually used for insects will not kill these sucking creatures, which can be attacked only by applying a spray to their bodies. Mr. Arthur Gibson, the Dominion Entomologist, in his new bulletin on "Insects of the Flower Garden," recommends three principal mixtures, kerosene emulsion, whale oil soap, or fish oil soap and tobacco extracts. The kerosene emulsion is the most difficult to prepare and the method of doing so is clearly explained in the bulletin. The soap preparations are used at a strength of one pound to four gallons of water for brown or black aphids, and one pound to six gallons of water for green plant lice, so frequently seen on rose bushes. The tobacco extracts are offered in seed stores and sometimes in other stores in the form of nicotine sulphate, otherwise known as Black-Flash. This is effective when applied at the rate of about two pounds to forty gallons of water, or in small quantities, two teaspoonfuls to a gallon of water with a little soap added. Mr. Gibson's bulletin, No. 99, of the Department of Agriculture, which is free, describes practically all of the insects that trouble a flower garden and gives illustrations of the insects themselves and of the harm they do.

First Horses Were Small

No Larger Than Cats, and Had Four Toes, Say Authorities

The first horses in the world were as small as cats, according to the Field Museum authorities. They are referred to scientifically as "Eohippus," which means "dawn horse." According to the paleontologists, they existed about 55,000,000 years ago. The cast of the skull of one of the animals, found in the Wyoming Bad Lands, and a model of the animal itself, are exhibited at the museum. While the modern horse, as we know it, closely resembles the eohippus, there were several differences. For one thing, the wee horse of ages ago had four toes.

Clock Has Three Hands

On the Baptist Church at Stonington, Conn., there is a steeple clock with four faces and every one of these faces has three hands, not two. The reason for this is that Connecticut is officially on standard time, but the citizens of Stonington favor daylight saving, hence two black hands point to standard time on each face of the clock and a red hand points to daylight saving time.

Don't waste your time trying to figure out how much of a snake is body and how much is tail.

How Fabrics Were Named

Romance Is Attached To Materials In Common Use

How many people are aware of the romance that lurks in the names of fabrics?

Cotton is the Arabic quinn. Calico is corrupted from Calicut, in India. Muslin is from Mosul, whence it was first exported, though nearly all of the cotton muslin names are Indian; Sanskrit gives us chintz; gingham is a Malay word; nainsook is Hindustani; Jaconet is from the town Jagannath, near Calcutta.

Of the silks, damask, of course, is shortened from Damascus; taffeta comes from the Persian word taffian, which means both "to shine" and "to spin." Poplin is an interesting exception to Eastern derivation. No one would associate a curtain or dress material with the Pope, yet poplin really means a Papal cloth, for it was first made at the Papal town of Avignon, in France.

The most romantic name-chain of all links an Arabian prince with cats. It concerns a forgotten watered silk called tabby - vain old Popsy had his "false tabby waistcoat with gold lace." The word came to England from Arabia by way of France and Spain.

The Arabs named the silk after a quarter of Bagdad, 'Attabiy, in turn it was first made. 'Attabiy, an Arabian prince. So from Prince 'Attab comes the word we use today for a cat whose wary patterned coat resembles the material - surely the strangest monument to any prince's memory!

Survey Of Sheep Ranches

Work To Be Undertaken In The Three Prairie Provinces

Under the direction of the National Research Council of Canada, a party including Prof. J. P. Sackville, of the University of Alberta; Prof. A. M. Shaw, of the University of Saskatchewan; and W. H. J. Tisdale, assistant manager of the Canadian Wool Growers' Association, has started a survey of sheep ranches in the three western provinces. A study is being undertaken of the advance made by ranchers in improving the quality of their wool clip by selective breeding and this field survey will be preliminary to a series of laboratory tests to determine the relation between breeding and the improvement of the fleece.

Just Slightly Mixed

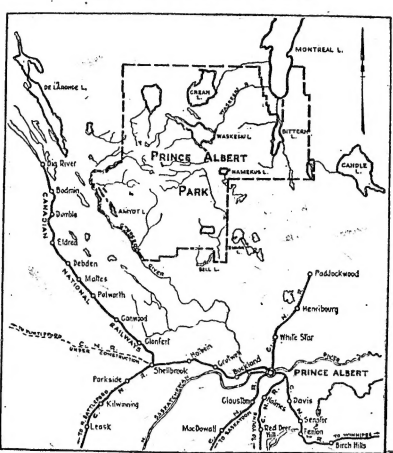

A bishop was walking in a rural part of his diocese on a hot day, and stopped at a cottage to ask for a glass of water.

The old lady who brought it was very nervous, and to put her at her ease the bishop said: "This is very beautiful water. Where do you get it?"

"Oh which the flustered dame replied: 'From the lord, my Pump!'"

The Ottawa Journal makes the discovery that practically all the motor accidents are caused by the nut that holds the steering wheel.

NEW NATIONAL PARK

Prince Albert National Park, in the northern part of Saskatchewan, is to be opened officially on the afternoon of August 10th, by Prime Minister, Rt. Hon. William Lyon Mackenzie King, who is being presented with a cottage on beautiful Lake Waskesiu by his constituents. The 1,400 square miles which comprise this new playground embrace many splendid lakes and streams abounding in fish and providing all the scenic and other requirements which are demanded by the holiday-seeker.

The park is most easily reached by

way of the Canadian National Railways to Prince Albert and from there by motor road. Waskesiu Lake, where most of the opening festivities will take place, lies about 70 miles north of Prince Albert and the road into it will be completed in plenty of time for the event. An elaborate programme is being planned by the committee and special housing arrangements are being made. In addition to the Prime Minister, many men prominent in the public eye of Canada will attend the opening on August 10th - Map by Canadian National Railways.

A Tip To Farmers

Expert Advocates Skim Milk and Tankage For Pigs

While pasture reduces the amount of protein supplement required for best results in feeding corn or barley to pigs, more rapid gains will be made and less feed required for gains if skim milk, tankage, or a mixture of two parts of tankage to one part of oilmeal are fed with the corn or barley, according to Verne A. Freeman, specialist of the animal husbandry department at the Michigan State College.

"Legumes and rape rank high as pasture for swine and even the grasses are good during the growing season," says Mr. Freeman. "With good pasture, one pound of tankage or the recommended mixture of tankage and oilmeal, fed with about 20 pounds of corn or barley, reduces the feed required to produce a pound of gain and increases the rapidity of gains. It is much more desirable to feed a protein supplement and the saving from feeding it is greater when corn and barley are high in price, as is the case at present."

"Skim milk is the best protein supplement available and where one has plenty of one and a half to two pounds of skim milk to feed with each pound of grain fed, there is no need to buy tankage or any other high-priced supplement."

Self-Feeding Produces Select Hogs

Grade Higher Than Those That Were Fed By Hand

Contrary to usual expectations, hogs that were allowed to help themselves at the self-feeder, at the Indian Head Experimental Station, produced more of the select bacon type than did those fed by hand at regulation meal times. In the report of the superintendent of the station for 1927, an experiment is outlined. Dry feed lots were used in which were placed eight hogs of approximately equal weight. These hogs were fed the same grain ration as another lot of the same number and type fed by hand. At the end of 126 days the hogs were shipped to a packing plant where they were graded both on the hoof and in dressed condition. The self-fed hogs graded 62.5 per cent select on the hoof and 37.5 per cent hump up on the rail, as compared with 25 per cent, of selects on the hoof and on the rail in the hand fed lot. The report, that may be obtained from the Director of Publicity, of the Department of Agriculture, at Ottawa, contains in table form details of this and many other experiments with swine and other live stock and field and garden crops.

Fourteen Billion Pounds Of Milk

Value Of Dairy Products Over \$250,000,000

Production of milk in Canada totals nearly 44 billion pounds, of which nearly 41 billion pounds is consumed as milk, about the same quantity is used in creamery butter, 2 billion pounds in the manufacture of cheese, and over 2½ billion pounds in dairy butter.

The value of these dairy products according to the Dairy Branch of the Canadian Department of Agriculture is over \$250,000,000.

Last year Canada had 3,894,311 milking cows, an increase of 55,120 over the previous year. Dairy products take second place as agricultural revenue producers, field crops leading with \$1,234,193,000. The total gross agricultural revenue for Canada in 1927 amounted to \$1,736,439,000, and the gross agricultural value \$7,993,460,000.

A Gymnasium For Babies

There has been recently opened in Berlin a gymnasium for babies under one year of age. Here the youngsters are brought by their mothers, laid out on flannel-covered tables and put through setting-up exercises. The exercises are conducted by trained assistants, one for each baby. The assistant holds the arms and legs of the child and at the word of command puts the timed motions which older gymnasium classes carry out for themselves under similar leadership.

Had Not Improved

"Less than two years ago," said the professional booster, with a wide sweep of his arms to include a new outlying area of his city, "this was all farm land."

"Is that so?" said the visitor, who was somewhat artistic and had a sense of beauty, as he looked over the shacks, pools of stagnant water, abandoned automobiles and so on. "Is that so? That's too bad."

Black: "If you were condemned to die, what kind of a death would you choose?"

White: "Old age."

Monetary Returns Are Secondary

Most Valuable Asset Of College Education Is Breadth Of Vision

As a general thing, when statisticians discuss the merits of a college education they quote voluminous figures about earning capacity, writes Mrs. Walter Ferguson, in the New York Telegram.

They go down the line and show how a college-bred man at 40 is able to earn from five to six thousand a year, while the untrained worker must get along on twelve hundred.

Then they resort to "Who's Who" and figure out just what per cent. of the eminent gentlemen who make up that publication have gone to college and majored in deep subjects.

The ordinary person who shies at the multiplication table and per cents is not going to rise up and contradict them. We are all willing to take their word for it.

However, there is a fact that they seem somehow always to overlook when they talk about educational rewards. The monetary returns, while they do come in handy, are the smallest part of the good that accrues from those years spent in a search for learning.

The average college man - that is, the average intelligent college man - gets something far more valuable than money and a big job out of life. He has broadened his vision and therefore never afterward lives entirely within the limited sphere of his own small world. Having read history, he visions other civilizations, and while his mind travels back along dim and ancient paths he is also able to peer into a future that may hold unlimited possibilities for his children. He tastes the sweetest savors of life.

He knows how to read, how to look at pictures, how to listen to good music, how to appreciate fine sculpture and sometimes how to think - the greatest achievement of which mortals are capable.

At any rate, a good college career given to the right person enables a man to keep an open mind. And need to being able to think for yourself, an open mind that tries to understand the thought of another is the finest gift of education.

Dye Used By Ancients

Woad Is Still Superior To All Modern Substitutes

The ancient Britons, we are told, dyed themselves blue with woad. The moderns of the dye world is still carried on, although it is not used for its original purpose.

Huge, cumbersome wooden rollers drawn by horses are used to crush the plant, and in the village of Parnon Drove, in the Fen country, a woad mill is still in seasonal use. Its processes probably differing little from those of two thousand years ago.

Woad has its uses in newer industries, and for certain purposes its value still remains superior to all modern substitutes.

New Method Successful

A new method of keeping cream sweet is being put into use in Scotland. In this process the cream is heated to 235 degrees Fahrenheit and then cooled to 50 or 60 degrees. It is said that the cream will stay sweet from six to ten days, depending upon the weather, and that it will stay sweet for several weeks if kept in a vacuum churn.

Rubber From Potatoes?

Will the potato prove to be the world's great source of rubber? The best synthetic rubber is about equal to the best grade of reclaimed rubber, the way has been pointed out for improvement. "What is needed," says Dr. William Crocker, "is a large supply of cheap amyl alcohol, which can be obtained from potatoes."

"You are growing. You are quite a little man!"
"Yes, I already reach up to the hem of mother's skirt!" - Dena Hsu, Mao, Madrid.

Principal of School
Highly Praised

The Board of Trustees of Chinook Consolidated School No. 16 has received such an excellent report from J. A. Smith, Inspector of High Schools, in regard to the conduct of the school and the success of the work under the direction of the Principal, W. S. Korek, that we cannot refrain from publishing the report in full.

The inspector reports Mr. Korek as a person of good poise in class room, energetic and aggressive, of more than average culture, high ideals, has a good influence over the students.

Mr. Korek must be given much credit for the marked change in the general tone of your school. Considering his age, and experience he has done excellent work. I found the standard of work, the attitude of the students, and the general tone of the class room much better than at any time since I made my first inspection of your school. Mr. Korek has the work of the three grades so effectively organized that he is able to give the maximum direction and help to each grade. In past years it was always found at the time of inspection that the year's course in a number of subjects had not been covered and a consequent rush to cover these courses before the beginning of examinations.

This year I found all work covered and thoroughly reviewed. These students have had every opportunity to meet with success the requirements of the year's work and, judging from the good showing on the tests conducted, have made the best use of this opportunity.

I examined the classes in Physics IX, Geometry IX, Algebra IX, Algebra X and Arithmetic XI and was highly pleased with the students' efforts. Mr. Korek has laid an excellent foundation in the mathematical subjects of Grade IX. The students should be able to pursue the study of these subjects with some degree of satisfaction and pleasure. With possibly one exception they had developed more than average power to concentrate and initiative and alertness in the solution of problems. This is one of the best classes that I inspected this year. The work of Grade X was almost equally efficient. I found only fair ability in Arithmetic among the Grade XI students, but the best was made of the ability they have. They should meet with good success on a test that does not require too much originality and independence of thought.

I observed Mr. Korek conduct class work in Latin (I), Literature IX, Literature XI, and History IX. All these lessons were in the nature of review. Mr. Korek has purposeful and effective methods of conducting review work. The home reading of the students is very definitely directed and judging from the class response the students are meeting his requirements of home study. A high standard of achievement is kept before his classes in all subjects.

I examined the work of the three grades in written Composition and was satisfied with the quality and amount of work accomplished. The majority of the students exercised care and neatness in expressing their ideas in good written English. Mr. Korek has been conscientious and critical in the supervision of this work.

Mr. Korek holds a firm place in the respect and affection of his students.

Mrs. Chas. Falk and two daughters, who have been visiting at the home of A. Rosenau for the past six weeks, left on Tuesday for their home in Wisconsin. Mr. and Mrs. Rosenau Sr. accompanied them and will make an extended visit in Minnesota and Wis.

M.D. Sounding Creek No. 273

Meeting of the council was called to order at 4 o'clock p.m. on Saturday, July 7th, with Councillors Cameron, Lawrence, Armstrong, Synnuck and Goodband present.

Minutes of the previous meeting were read and adopted on motion of Mr. Lawrence.

Moved by Mr. Lawrence that we increase the appropriation for roads by one mill on the assessment.

Moved by Mr. Synnuck that we accept Mr. Jensen's proposition in purchasing a Richardson Road Builder, namely \$1,085 net, laid down May 1929, without interest. If price advances the costs will be \$1,085, and if there is a reduction in price then the municipality receives the lower price.

Moved by Mr. Goldband, that we purchase eleven 12 inch by 24 feet steel culverts, one 10 inch by 24 feet steel culvert, two 18 inch by 26 inch by 24 feet creosoted culverts, one 11 1/2 inch by 16 inch by 20 feet creosoted culvert.

Moved by Mr. Cameron, that we make a grant of \$50 to each of the Youngstown and Chinook Agricultural Societies.

Moved by Mr. Cameron, that the tax sale be held on Oct. 31st, 1928.

Moved by Mr. Synnuck, that the N.E. 1/4 of Sec. 18-30-7-4 be rented to Mr. Mayfield for one quarter share of all crops grown on the land, clear, to be delivered at the elevator.

Moved by Mr. Lawrence, that the N.W. 1/4 of Sec. 20-29-7-4 be sold to Mrs. Doris L. Sandman for the sum of \$542.20, subject to all reservations to the Crown.

Moved by Mr. Cameron, that the offer of \$1,500 from S. J. Osmond for the purchase of the N. 1/2 of Sec. 17-30-8-4 be accepted, subject to all reservations to the Crown.

Moved by Mr. Lawrence, that we sell the S.W. Quarter of Sec. 8-29-7-4 to O. O'Malley for \$258.17, subject to all reservations to the Crown.

Cheques issued by the reeve and secretary were authorized, on motion of Mr. Goodband.

The financial statement, as presented by the secretary, was approved on motion of Mr. Synnuck. Bills totaling \$1623.75 were ordered paid, on motion of Mr. Cameron.

Meeting adjourned to meet again on the 4th of August, on motion of Mr. Cameron.

Must Deliver Wheat By July 16

The announcement was made on Monday at the head office of the Alberta Wheat Pool that the cut-off date for deliveries of wheat from the 1927 crop was Monday, July 16. That will be the last day wheat would be received for the 1927 pool. Cars of wheat billed out on that day and street wheat delivered on that day at country elevators would be included in the 1927 pool. All wheat received after that date would go into the 1928 pool.

The Cereal Chautauqua begins July 19th and continues six days. The program is excellent, well balanced and can not fail to please. The price of admission is \$3.00 for a season ticket; children \$1.00. It will pay to buy a season ticket, as the price of single admissions run from 50c to \$1.00 for each performance.

Chinook district is well represented at the Calgary Stampede this week. Space will not allow special mention of each one.

D. E. Bell is in Saskatoon this week on business.

N. D. McKinnon and Miss R. McKinnon are on a visit to Edmonton and Jasper this week.

Fortnightly Crop Report

Early sown wheat is well headed out in many sections of the province and all grains are making splendid growth, according to telegraphic reports received by the Department of Agriculture on Friday for the fifth fortnightly crop report of the season. Growing conditions have been ideal since the last report was issued, the entire province having benefited from general rains during the past two weeks. Crops which appeared somewhat patchy owing to the delayed germination reflecting the drouth in May, are showing a much greater uniformity, and little difficulty is anticipated at harvest time as a result of this situation.

Coarse grains have all been making vigorous growth and a great many fields of oats and barley are in the shot blade. All crops have stood much more heavily than was expected during the dry period, with a consequent improvement in the prospect for a heavy yield. A number of districts report that summerfallowing is being temporarily delayed by the unusual amount of moisture in the soil. Conditions have been ideal for breaking and in many localities more new land is being brought under cultivation this season than for many years.

Rain has interfered to some extent with haying in the southern part of the province, where a very satisfactory crop of alfalfa and sweet clover is being cut. Good progress is being made with the thinning of the sugar beet crop and a good yield is promised from the 6500 acres sown to beets this year.

Crops in the Peace River section of the province are somewhat more advanced than at this date last year, and prospects for a very satisfactory yield are reported.

Crop damage has been confined to the effects of hail over very limited areas and is negligible. Practically no injury from insect pests is reported. Pastures have made renewed growth as a result of the rains and livestock is in very satisfactory condition.

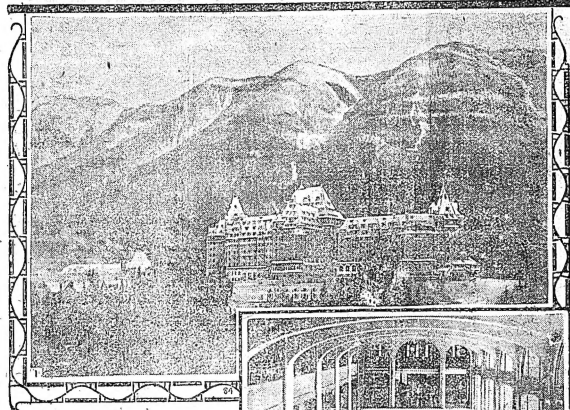

Cole & Rogers' Circus is Coming
To Town For Two Performances

The circus is coming. There's news for you! Cole & Rogers will bring their Circus and Wild West offering to entertain this community on Friday, July 20, with performances afternoon and evening. In addition to the regular circus, the sideshow and the many enjoyable features common to circuses, there will be displays of horsemanship and dare devil riding by skilled masters of the rein, spur and saddle.

And speaking of horses—there is "Pewee" with Cole & Rogers' Circus and "Pewee" is a horse worth going miles to see. Here is a perfectly formed equine, standing 26 inches high and weighing only 40 pounds; mouse-colored, sleek, healthy and as perfect as horse can be formed. Imagine the joy of the youngsters to see this tiny animal! Guess if you can how every boy and girl will thrill with the imagination of owning, riding and petting "Pewee," their tiny friend.

But there will be troops of "regular" horse, wild animals and rare denizens of the jungles and forests, Acrobats and athletes, men and women of skill and poise, on horseback or swinging in the air; funny clowns to make old and young forget themselves in spontaneous laughter; dogs, ponies and domestic animals doing cute and almost unbelievable tricks—everything to amuse and delight old and young is promised in the program of entertainment Cole & Rogers' Shows will bring to town.

Mountain Resort Acquires New Charms

1.—Alone in its world is the Banff Springs Hotel. 2.—An interior view of the new swimming pool built in the hotel.

Acknowledged by the most discriminating as the finest resort hotel on the American continent the Banff Springs Hotel, opened by the Canadian Pacific Railway Company on May 15, inaugurates a new era for visitors to the Rocky Mountains. This internationally famous center has been in process of rebuilding during the past two winter seasons and now stands complete, magnificent as to construction and furnishings and beyond compare as to beauty of surroundings.

The Banff Springs Hotel is so constructed as to blend, in the beauty of its architecture, with the snow capped peaks of the mountains ranged. Built of native stone quarried from the base of Mount

Rundle and framed with Tyndal stone from Manitoba the building itself, complies with all the tenets of dignity and good taste.

The Banff Springs provides accommodation for 1300 guests and contains 600 bedrooms with baths in addition to a large number of suites of marked beauty and comfort. The layout of the public rooms and lounges has been carefully thought out, and these rooms are especially appealing in point of design and richness of furnishings. The main lounges are things of beauty in themselves and the view down the valley of the Bow River, is alone worth a trip to Banff.

The building of this great hotel or rather the rebuilding, has been going forward for several years, but the construction work has not interfered with the comfort of the summer guests. The work has been carried on during the winter months. Enormous wooden shells were erected and heated throughout with steam, and the work done with the same ease as if at the height of summer. It is interesting to note in this connection that this system of construction involved a monthly consumption of coal of more than 700 tons.
